SCOPE OF WORK

Multi-Vendor E-Commerce & Quick Commerce Platform

1. Project Overview

The objective of this project is to develop a comprehensive Multi-Vendor E-Commerce & Quick Commerce Platform that enables customers to purchase a wide range of products including grocery, garments, household essentials, handicrafts, and locally manufactured goods through a single application.

The platform will also feature a dedicated Quick Commerce (Grocery) module with scheduled subscription deliveries, along with a Self Help Group (SHG) Marketplace where SHG members can sell homemade and community products.

A unique feature of the platform is the integration of the client's CDS Community Membership System, allowing existing members to verify and view their membership status directly within the application.

The solution will support both General Vendors and SHG Vendors, while also enabling small sellers to market products under the client's own brand through a dedicated branding and packaging approval process.

The complete ecosystem will consist of:

- User Mobile Application (Android & iOS)
- Seller Panel
- Delivery Partner Application
- Super Admin Web Panel
